

The Company Growing for *You*

OFFICIAL NOTICE:

Spring HAS NOT Been Cancelled!

Enough doom and gloom. It's time for all of us to brighten the world around us with the beauty of Spring! Plants and flowers bring life, comfort and beauty to our lives, and it is our mission to help you bring color into lives of your community, customers and friends.

Early markets in the South and East USA are extremely strong. In many cases, record sales are occurring. People are anxious to add flowering color to their worlds. There is a great opportunity for those with garden products to fulfill this demand.

Plantpeddler is ready and fully stocked. Early season Pansy crops are coming into peak color, and there is no better way to say Spring. Additional Spring crops are coming into bloom daily. We are in full production and crops are growing beautifully. Also, be sure to preorder plenty of vegetables. Expect big demand.

Based on current events, we have implemented special delivery protocol to help ensure safe delivery for all involved. Signatures will not be required on receipt, only a name for confirmation.

Delivery routes are running. Please give us a call if you are interested in jumping on board. We'll also be checking in as we think Spring!

The Team at Plantpeddler
